Installation

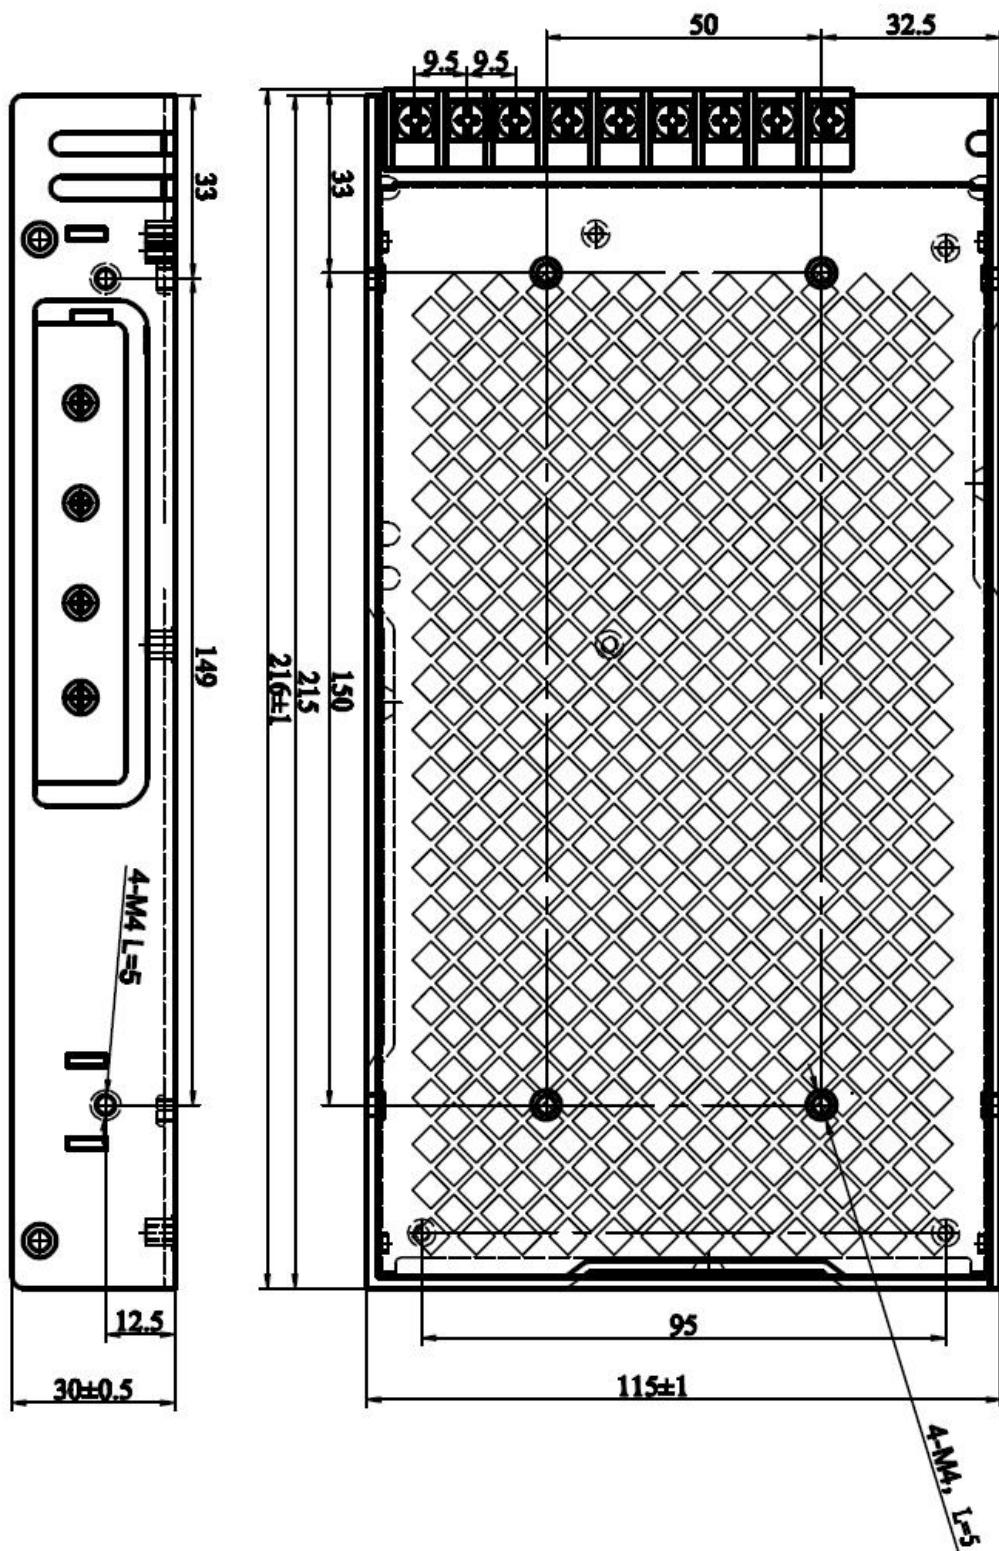

1. In order to comply with the reduced amount of curve and static characteristics curve, A-200FAK must be installed in a plate (or the same size above the casing), advice sheet size for 450*450mm*3 for optimizing the thermal performance of aluminum must have a very smooth surface (or coated with thermal paint), and A-200FAK must tightly fitted in the middle of .
2. To ensure good heat dissipation, the power supply must be set aside at least 5cm of space around the installation, as shown in the figure below:
