

**RELIFE**

# Multifunction Metal Flux Paste

High insulation resistance

Strong weldability

Suitable for welding stainless steel, nickel sheets, copper, iron, galvanized sheets and other metals, repairing oxidation points, etc.

Easy to solder

The solder joints  
are bright

Good insulation

Environmentally  
friendly material

[ Multipurpose use ]

## Suitable For A Variety Of Welding

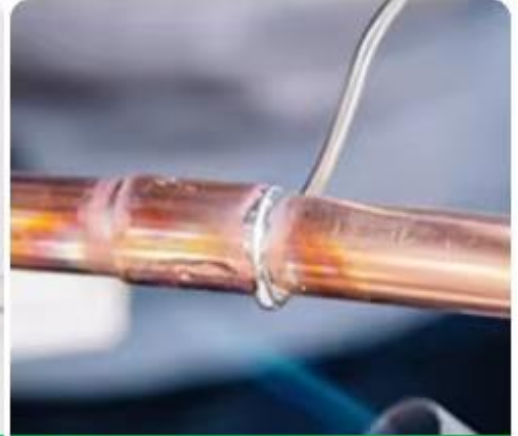

Wide range of application, suitable for most welding needs

Stainless steel welding

Galvanized sheet welding

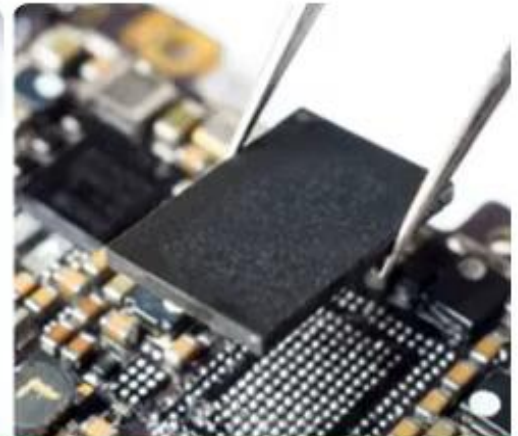

Copper surface soldering

Iron surface welding

Nickel sheet welding

Motherboard soldering

[ Easy to solder ]

## Make Welding Stable And Reliable

Enhance solder fluidity and help solder wettability

[- Balanced multi-temperature and not easy to dry out -]

## Strong Thermal Conductivity

The thermal conductivity is good in daily welding work, and it has a balanced over-temperature experience whether during fitting or desoldering.

No resistance, non-conductive,  
strong weldability

[ Safe and non-conductive ]

# High Insulation Resistance

47mm

48mm

43mm

BRAND	RELIFE
PRODUCT NAME	Multipurpose metal special flux
MODEL	F-22
SPECIFICATION	55g
PRODUCT SIZE	47*48*43mm

01

### Non-corrosive

Easy to weld, easy to clean, no pungent smell, environmentally friendly solder mask rosin

### Reduce surface tension

Quickly remove the oxide film on the welding surface, making it easier to weld and preventing oxidation

02
