

Sensor pirólico GH-718C

Funcionamiento:

Detecta el movimiento de cuerpos (personas), mandando un pulso que dura alrededor de 4 u 8 segundos cada que detecte movimiento.

Características:

CARACTERÍSTICAS	DESCRIPCIÓN
Alcance de detección	7 m
Ángulo	110°
Consumo de reposo	50uA
Voltaje de alimentación	5V
Ajuste de disparo	2 (Alto o Bajo)
Señal de salida	Pulso de 3 V

Diagrama de conexiones:

- 1: - Power cathode
- 2: Out signal output
- 3: + Power anode
- 4: H override trigger Port -Yes
- 5: L override trigger Port -No
- 6: Photoresistance
