

Types of Handle

GT-Y050

50W mini soldering iron, suitable for small welding components.
(Using T50 series integrated soldering tip)

GT-Y130

130W middle size soldering iron, suitable for most welding components.
(Using T130 series integrated soldering tip)

GT-Y150

150W soldering pen, suitable for soldering oversized pads and large workpieces.
(Using T150 series integrated soldering tip)

GT-N100

100W electric tweezers, suitable for soldering and desoldering various SMD devices.
(Using T100 series integrated electric tweezers)

Vacuum Pen GT-B001 (MS-900)

Straight Suction Needle

Suitable for suction inunimpeded space.

Bent Suction Needle

Suitable for suction inlimited space.

Anti static suction cup is suitable for current sensitive components and can be disassembled and pasted with materials such as IC/LED beads/resistors/chips

Metal Iron Stand

During use, the welding nozzle can be quickly disassembled
