The **480x272px** screen is driven by an **FT801** graphic controller which is supported in **Visual TFT**, the GUI design tool for rapid development of user interfaces.

The **FT801** controller supports multitouch gestures with up to five touches as well as gesture detection for the capacitive touchscreen.

The connector uses an **I2C/SPI** interface. To use it with various MikroElektronika hardware, a **Riverdi click** adapter board is available (interface between the connector on the display and a mikroBUS™ socket).
