

# MSBL-ZW1

## Product Images

## Description

Backlight stage polarizer designed for use with Dino-Lite models with built on polarizers (AM4113ZT, AM4115ZT, AM7115ZT, etc). This easy to use backlight stage with polarizing ability comes with an attachable swing arm target holder for specific placement of objects. The MSBL-ZW1 is a sturdy and attractive backlight stage that is powered through a USB cord or AC Adapter. Adjustment of the polarizer is simply performed by sliding the wheel adjustment located on the front of the stage. Researchers may find that the BL-ZW1 could be an economic substitute to the traditional polarizer microscope. The MSBL-ZW1 backlight stage combined with a polarizing model has the potential to meet many applications covered by polarizing microscopes.

- Diameter of illumination: 4.5cm

## Additional Information

---

Warranty Period	90 days
Manufactured in	China
Service & Support	U.S. ( <a href="http://www.dinolite.us">www.dinolite.us</a> ) English & Spanish
Regulatory Approval	CE, FCC, ROHS
Dimensions	10.1cm (L) x 9.5cm (W) x 1.9cm (H)
Weight	330g
Material	Metal, Glass
Compatible with	All Dino-Lite Handheld Microscopes
Package Includes	AC Adapter, Stage, USB, Arm / Target Holder
Package Dimensions	16cm(L) x 16cm(W) x 6cm
Package Weight	622g
Product Schematic	<a href="http://www.dinolite.us/media/images/schematics/BL-ZW1sch.pdf">http://www.dinolite.us/media/images/schematics/BL-ZW1sch.pdf</a>
