

OKY1212: KIT DE SENSORES Y ACTUADORES

Description

This is an excellent collection of sensors and components to use for Arduino. It was specially designed for smart home. It comes with 16 sensor modules and female to female jumper wires, everything was properly identified and individually packed in plastic box. No matter where you are, the smart home sensor kit combined with uno and mega or Raspberry let you to control, monitor and secure your home. And you can visit here to know how to do the DIY ,with this smart home system ,you will be able to control your remote relay in real time.

DHT11 temperature Humiture Sensor	1
HC-SR501 IR Pyroelectric Infrared PIR Motion Sensor Detector Module	1
DS1302 Clock Module	1
Rain sensor / module rain weather module	1
TCRT5000 infrared/optical tracking sensor	1
HC-SR04 ultrasonic sensor	1

Fire detection of flame sensor module	1
Laser Transmitter Module	1
Photoelectric sensor module	1
Soil humidity sensor	1
Black and white line identification for obstacle avoidance sensor	1
Vibration sensor module	1
MQ-2 gas sensor module	1
315M super regeneration of 315M wireless transceiver module	1
