OKY2233

Product Name:RF module For ARDUINO UNO Mega1280 Mega2560 Nano

Product Module：OKY2233

Product Description:

1. This shield is a compliant solution designed to meet low-cost, low-power wireless sensor networks with special needs. The module is easy to use, low power consumption, and the provision of critical data between devices reliable transmission. As the innovative design, can be in the range 2-3 times beyond the standard modules. This module work in the ISM 2.4 GHz frequency band. The MaxStream's module is pin-compatible.

2. The module is widely used in the United States, Canada, Australia, Israel and Europe. The establishment of RF communication does not require any configuration and the module's default configuration supports a wide range of data system applications. You can also use a simple AT command to advanced configuration. An OEM developer is now development package.

3. Size: 60*62*20 mm.
