

OKY3199-2

Product Name:H-bridge Stepper Motor Dual DC Motor Driver Controller Board HG7881 For Arduino

Product Module: OKY3199-2

Product Description:

1. Onboard Two PCS HG7881 motor controller chip.
2. Module can drive 2 DC motors simultaneously, or one 4-wire 2-phase stepping motor.
3. Module input voltage: 2.5-12V.
4. Has a continuous current of 800mA per channel output capacity.
5. PCB size: 29.2 (mm) x 23 (mm).

Package Included

Packing List	Qty
H-bridge Stepper Motor	1
