

OKY3222-1

Product Name:DC 3-5V Vibration Switch Single-Channel Vibration Sensor Module For Arduino

Product Module: OKY3222-1

Product Description:

- 1.Model:N/A.
- 2.Color:Red.
- 3.Material:FR4.
- 4.With signal output instructions.
- 5.Single-channel signal output.
- 6.With mounting holes for fixed installation.
- 7.Switch output circuit board, can be directly the microcontroller IO port.
- 8.Working voltage: DC 3-5V.
- 9.Usage: teaching experiment demonstration, product development and so on.

Package Included

Packing List	Qty
Vibration Sensor Module	1
