

OKY3236-1

ADAPTADOR SERIAL USB-TTL

Description:

This is the USB to Serial Breakout for the FT232RL, a small board with a built in USB to serial UART interface.

This little breakout is built around the FT232RL IC from FTDI, with an internal oscillator, EEPROM, and a 28-pin SSOP package this is a serious little chip.

With this version, we've corrected a few issues found with the board.

These changes include fixes to the VCCIO, a change from the mini-USB to micro-USB connector, and a few footprint modifications.

Color: Blue

Material: Metal

Implements full v2.0 USB protocol

Needs no external crystal

Internal EEPROM for device ID and Product Description strings

Royalty-Free Driver support for Windows, Linux, and Mac OSX
