

OKY3278

Product Name:Photo Interrupter Sensor Module For Arduino

Product Module: OKY3278

Product Description:

- 1.Photo interrupter module and a digital interface, built-in 13 LED build a simple circuit to produce photo-interrupter warning lamp
- 2.It comes with digital interfaces of the LED, the light blocking access number 3 sensor interfaces, sensing when the light Interrupter device senses a key signal, LED lights, otherwise off.
