Add: Room1105, Block B, ChinTo Technology Building, Minzhi Road, LongHua, Shenzhen, China

SKU:OKY3385-2

Name:315MHZ or 433MHZ RXB8 V2.0 superheterodyne high sensitivity wireless receiving module

Description:

- 1.The receiving sensitivity reaches -114dBm
- 2.Working frequency:315 MHz or 433 MHz
- 3.Power supply voltage input range:4.5V-5.5V
- 4.Power consumption,5.0 V/12mA;continuous data rate to 2.4kbps
- 5.Good selectivity and stray radiation suppression ability
- 6.Temperature range:-30-85°C

Scope of application:

- 1.Car remote control door switch (RKE)
- 2.Remote control of door openers and barriers
- 3.Wireless security alarm
- 4.Remote control curtain machine
- 5.Wireless industrial controller
- 6.Wireless parking lock

Specification:

Weight:40g

Package Including:

1 * wireless receiving module
