

OKY3462-1

Product Name:XH-M145 Audio Module Digital Amplifier Module
Audio Amplifier Board

Product Module: OKY3462-1

Product Description:

1. Type: XH-M145 Board.
2. Size: 56mm x 36mm.
3. Work: D class.
4. Chip Type: YDA138-E.
5. Recommended voltage: 12V 1.5A.
6. Channel Type: Two-channel.
7. Sexual noise ratio: 92%.
8. Output power: 8W + 8W (8 European speakers) 12W +12 W.
9. The Power Amplifier board using chip YD138-E chip, the chip has over-current protection, thermal protection, noise reduction and other characteristics.
10. Wide voltage operating range, DC 9-14V, current 2A and above can work properly.
11. Powerful and powerful, large dynamic range, small to cricket cries, big guns sound, can be a very good performance, very small distortion. 8 ohms load is 2 * 8W, 4 ohms load is 2 * 12W.
