SKU:OKY3496-14

Name:PWM DC motor speed controller 5V-35V 5A speed control switch function LED dimmer

Description:

- 1.DC motor governor input is DC,can not directly connected to the AC (for example:home 220V AC),otherwise it will burn!
- 2.DC power supply positive and negative terminals do not reverse, otherwise the governor may be damaged.
- 3.The motor can be positive or negative, when the direction of operation and expectations do not match,you can adjust the line order to change the direction.
- 4.Adjust the potentiometer knob to change the governor output duty cycle,the motor speed changes.

Specification:

- 1.Operating voltage:DC4.5V-35V
- 2.Output current:0-5A
- 3.Output power:90W (max)
- 4.Quiescent current:7uA (standby)
- 5.PWM duty cycle:1% -100%
- 6.PWM frequency:20khz
- 7.Size:30mm x 26mm x 14mm (Without Handle)

Package Including:

- 1 * 5V-35V Speed Control Switch
