SKU:OKY3706-2

Name:DC5V atomizing film line driver board for small fans

Description:

- 1.Module voltage DV 5V,current 300mA,power 2W,frequency 108KHz,hole number 740, aperture 5um
- 2.Low driving voltage,low power,low impedance,stable waveform,high conversion efficiency, automatic shutdown after spraying for 10 minutes to prevent dry burning
- 3.Low dielectric loss,low heat generation,corrosion resistance,acid and alkali resistance, and long service life
- 4.Three PH2.0-2P terminals
- 5.This product is only suitable for 5V direct current of USB,and not suitable for 220V alternating current of household socket

Specification:

Weight:55g

Package Including:

1 * atomizing film line driver board
