## Especificaciones Impresora Ender 3V2 NEO

|                           |                                   |
|---------------------------|-----------------------------------|
| Tecnología de Impresión   | FDM                               |
| Volumen de Construcción   | 220*220*250mm                     |
| Dimensiones               | 438*424*472mm                     |
| Peso                      | 7.8kg                             |
| Velocidad de Impresión    | 120mm/s                           |
| Precisión de Impresión    | ±0.1mm                            |
| Grosor de Capa            | 0.05-0.35mm                       |
| Diametro de Boquilla      | 0.4mm                             |
| Temperatura de Boquilla   | ≤260°C                            |
| Temperatura de Cama       | ≤100°C                            |
| Diametro de Filamento     | 1.75mm                            |
| Pantalla de Visualización | A color con perilla 4.3 pulgadas  |
| Voltaje de Alimentación   | 100-120V, 200-240V, 50-60Hz       |
| Potencia                  | 350W                              |
| Filamentos Compatibles    | PLA, PETG, ABS                    |
| Formatos de Archivo       | STL, OBJ, AMF                     |
| Software                  | Creality Slicer, Cura, Simplify3D |
