ATTEN Soldering Iron
User Manual
ST-2065D/ST-2080/ST-2080D/ST-2150/ST-2150D

The soldering iron needs to be tested before it leaves the factory, so the soldering tip may cover a small amount of tin, and the casing will be slightly yellowing, which is a normal phenomenon.

5. Features

- Automatically sleep after 10 minutes and shut down after 20 minutes when the product stop operating
- Products use LCD display and LED display design
- Build in PID system, adjust temperature by button, operate easily
- The handle structure is ergonomically designed for comfortable grip.
- Display the temperature control status with a bright blue LED.
- The heating wire and sensor are made of PTC material, which is quick in temperature rise and precise in temperature control.
- Auto-standby, auto-shut down is available.
- Using 3 core power cable.

6. Operational Guide

A. Switch function

Charge on the product, short press power button, When booting, the screen display the temperature, as shown in picture 1: when shutdown, the screen display OFF, as shown in picture 2.

B. 9 groups shortcut temperature adjustment

In the working state, press “+” “-” “+” “-” “+” “-” switch temperature group (the default temperature value of 9 groups is: 250°C/482°F, 300°C/572°F, 325°C/625°F, 350°C/662°F, 375°C/707°F, 400°C/752°F, 425°C/797°F, 450°C/842°F, 480°C/896°F, 480°C/896°F.)

</table>

(1) Quick temperature adjustment
While in the working state, hold down the power button to enter the quick temperature adjustment, press the “+” “-” “-” button to adjust. Hold down the button to adjust the range at larger intervals: 80°C - 480°C.

(2) Temperature compensation adjustment
In the fast temperature adjustment state, press the power button to enter the temperature compensation setting, press “+” “-” “-” to adjust. Hold the button to adjust the range at larger intervals: ±50°C / ±90°F.

(3) Temperature unit switching
In the temperature compensation adjustment state, short press the power button to enter the unit setting, press “+” “-” “-” to switch C and F.

(4) Auto-sleep function ON/OFF
In the temperature unit switching state, short press the power button to enter the sleep setting, press “+” “-” “-” adjust, 1 means ON, 0 means OFF.

D. Heating
When the product is heated. The power light flashes, the brightness changes according to the power level, and the selected gear light is long.

E. Warning
When “H-E” displayed on the screen, there is no temperature, which indicates that the heating element fails.
When “S-E” displayed on the screen, there is a fault in sensor, which signifies that there is something wrong in sensor or the related circuit of the sensor.

Opportunational Guide

A. Booting
Short press power button to boot, default 390°C lights long after booting.

B. Temperature switching
In the working state, short press “+” “-” “-” to switch temperature.

C. Shutdown
In the working state, short press power button, the light of power button flashing after shutdown.

D. Heating
When the product is heated. The power light flashes, the brightness changes according to the power level, and the selected gear light is long.

E. Warning
When 5 lighting are all flashing, which indicates that the heating element fails. When 5 lighting are all lighting, there is a fault in sensor, which signifies that there is something wrong in sensor or the related circuit of the sensor.
